

**Job title:** Mobile Application Product Specialist  
**Department:** Development  
**Location:** Masterbuilt  
**Reports To:** Development Manager  
**FLSA Status:** Exempt

For over 40 years, Masterbuilt has built innovative and simple-to-use cooking products with the consumer in mind. It all started in Dawson McLemore's backyard in 1973 with our first propane fish cooker. Today, Masterbuilt is well-known for the quality of our electric smokers, fryers, grills and automotive accessories. From the Butterball Indoor Electric Turkey Fryer to our Masterbuilt Electric Smokehouses to our Hitch-Haul brand of cargo carriers, Masterbuilt strives to build products that help you "Share the Goodness" with your family and friends.

### **Summary**

We are looking for a creative, motivated person who will be focused on the design, development and maintenance of new products to help Masterbuilt expand its presence with digital products. The individual will lead the life-cycle for Android, iOS, and mobile web front end. This position will be involved in every step of the design and development process, from brainstorming product ideas to release and maintenance. This individual will also contribute to our existing mobile portfolio, maintaining functionality and backwards compatibility across products.

### **Essential Duties and Responsibilities**

- Contribute to existing native apps (Android & iOS)
- Develop work and resource plans, schedules and project estimates
- Leading daily relationship with development resources
- Integrate with backend systems via web services
- Improve code quality through writing unit tests, automation, and performing code reviews via quality control processes
- Participate in code reviews, standups, retrospectives, reviews and sprint planning sessions
- Contribute innovative and original ideas to our technology and products
- Work with product and design teams to understand end-user requirements and use cases, then translate into a pragmatic and effective technical solution
- Research and resolve difficult problems and successfully deliver results within a timely manner

To perform this job successfully, an individual must be able to perform each essential duty and responsibility listed above satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

## **Requirements and Qualifications**

- 3+ years of professional Android & iOS development (minimum 1 year each)
- Experience building and using web-based API documentation
- Hands-on experience developing or troubleshooting connected technology
- Strong debugging and troubleshooting skills combined with a knowledge of mobile testing tools and techniques
- Track record for being involved with released mobile applications
- Prior experience successfully releasing consumer facing applications on Android and IOS
- Experience in web service integration (SOAP, REST, JSON, XML).
- Experience working with agile software development methodologies and tools such as JIRA
- Front end development experience (JS, HTML5, CSS3)
- Experience with GitHub or similar version control system (ex. Mercurial)
- Problem solving skills to develop quick yet sound solutions to resolve complex issues
- Teamwork & collaboration skills to work across organizations and cross-functional teams
- Communication & stakeholder management skills
- Bachelor's degree or higher in Computer Science or satisfactory combination of education and experience

## **Skills and Competencies**

- A collaborative team player who supports and enhances team objectives
- Passionate about mobile application development and mobile technologies
- Able to implement rapid prototypes as part of application design process
- Candidate should be highly organized, a self-starter, able to prioritize and carry out multiple functions simultaneously
- Candidate should be able to deal with high intensity situations involving problems with multiple variables in a wide range of situations
- Should possess excellent communication skills (both written and verbal)

## **Bonus Points:**

- Experience using Confluence, JIRA, and CI
- Excellent UI/UX skills
- PHP development experience

Masterbuilt Manufacturing is An Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability or protected veteran status.

Qualified candidates should apply for the position by sending his/her resume to [HR@masterbuilt.com](mailto:HR@masterbuilt.com).
